

Hello all! *Attendance*: all present.

1. Pinpad Vote: we can't have both pinpads and taps on the same door (against MIT security policy). Another vote to referendum:
  - a. Just pinpads on all doors
  - b. Pinpads, all doors but Hayden/Bemis
  - c. Not forcing halls that prefer tap access to remove it and place pinpads instead.
  - d. Decoy pinpads for Hayden/Bemis?
  - e. Halls can choose to have taps - halls can always go in the direction of more security.
  - f. Is it possible to turn a hall's pinpads off?
    - i. Probably?
    - ii. Ie. parties? --> don't want to tell everyone the pinpad code when parties occur (or have this be a thing people think to do).
  - g. MIT Security Policy does not like to have electronic and manual systems on the same door - going forward, they are strongly avoiding it.
  - h. How do we make the vote clear on the referendum? Clarifying email sent out five days or more before election.
  - i. Could halls just decide that they don't want Bemis/Hayden individually? --> halls stepping down security endangers EC as a whole, so no.

Both referendum measures pass 8-2.

2. Also voting: taps all doors?

Passes 6-4
